

Q1 (Set1-Q1). We want to understand more about the movies that families are watching. The following categories are considered family movies: Animation, Children, Classics, Comedy, Family, and Music.

The graph shows that animation is the most rented category for the families

Q2 (Set 1 – Q3). Finally, provide a table with the family-friendly film category, each of the quartiles, and the corresponding count of movies within each combination of film category for each corresponding rental duration category

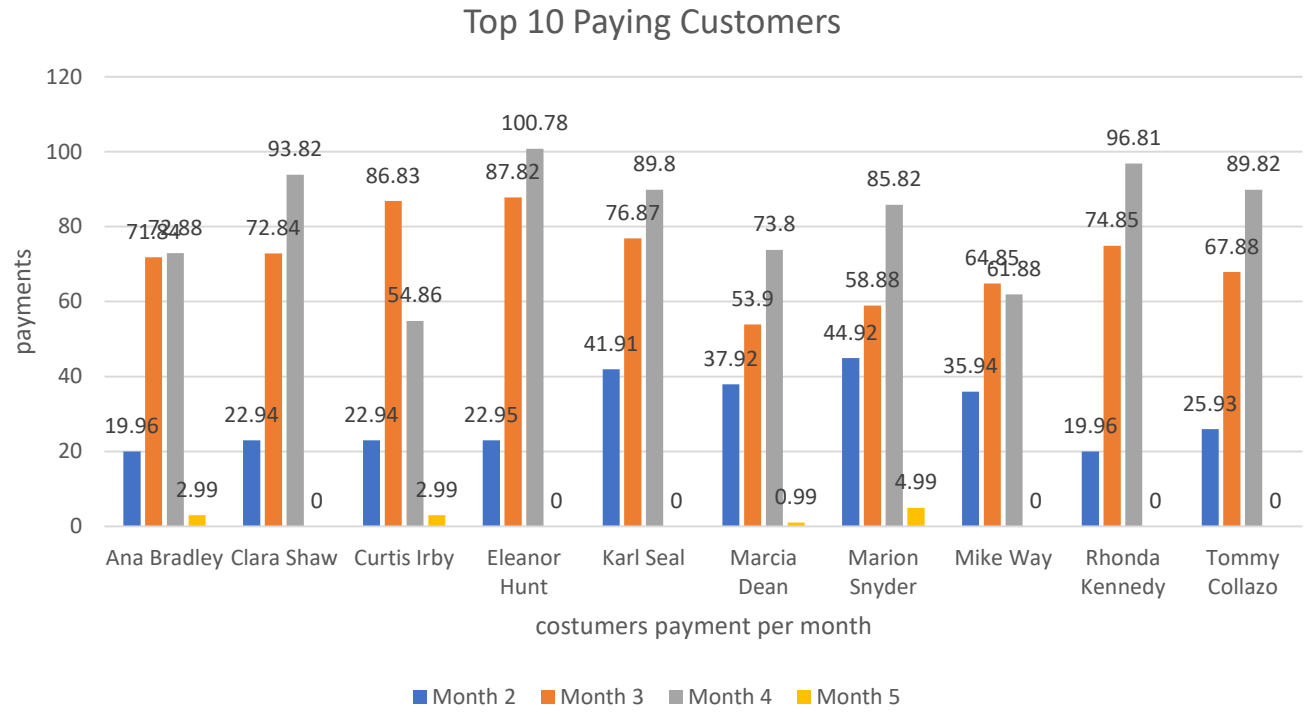

This graph shows that the family category has the highest rented duration

Q3 (set 2 – Q1). how the two stores compare in their count of rental orders during every month for all the years we have data for

This figure shows the comparison of the two stores for no. rentals every month

Q4 (set 2 – Q2). We would like to know who were our top 10 paying customers, how many payments they made on a monthly basis during 2007, and what was the amount of the monthly payments

The graph shows the top 10 paying customers, and we can see that the top paying customer is Eleanor Hunt followed by Karl Seal.
